# Miha Vidakovic

Web designer and front-end developer at PRO PLUS, d.o.o.
Slovenia

## Summary

I am a User Interface/ User Experience Designer/ Front End
Developer with over 7 years of experience. I have an extremely
strong understanding of: wire frames, mock ups, usability and front
end coding, along with a background in marketing and branding.

I have a keen eye for design and can create and translate comps/
concepts into standards-friendly code through the use of current
web technologies. I'm an effective communicator and thrive in a fast
paced environment where I can learn new technologies. I maintain
my composure when under pressure, and I'm always happy to
mentor those less knowledgeable and experienced.

I'm passionate and committed to producing high quality interactive
data visualizations using web standards while assisting in developing
and maintaining guidelines for Best Practices. I contribute to a
clean codebase that is efficient, organized and well structured. I
have learned through experience how to develop with change and
scalability in mind.

Specialties: Front End Coding, User Interface and User Experience
Design, Wire Frames, Mock ups, Branding, Marketing.

---
